

Circular Cube | Your Design Brief

Overview

Give a brief description of your company or organisation detailing things like it's function, the market or customer base, location, history, size etc.

Style

What style would you like your website to convey? I.e. classical, simple, modern, business-like, natural, vibrant, spacious, professional etc.

What colour scheme do you have in mind?

Do you have logos, leaflets or letterheads that you would like the web design to reflect?

Are there examples of other websites that you think convey what you have in mind for your site? For examples of websites designed previously by Circular Cube - see www.circularcube.co.uk/clients.html

Content

Do you have a rough idea of how many pages your site will need and the type of content that is required? Will the pages simply be text and images or will you require other features such as search, a blog or news page, a user forum, online buying, image gallery, calendar of events etc.

Updating

Once the website is complete how do you plan to make updates to it? These are the options:

- If you have website design skills then you could update it yourself.
- Employ Circular Cube or some other designer to update it for you.
- Have the site built using a Content Management System (CMS) so that you can make updates yourself without the need for web design skills.

Timescales

Do you have any timescales/deadlines for when the site needs to be completed?

Budget

Do you have a budget in mind?

Hosting

Do you already have a website host or do you require Circular Cube to host your website for you?
